## Plug Valve Lockout

- Four Sizes to Fit Most 1” to 8” Diameter Manually-Actuated Plug Valves
- Durable, Tamper-Resistant, Compact in Size and Easy to Use
- Service Temperatures from -25°F to 200°F

Part Number	Description
113231	Plug Valve L/O for up to 7/8” Stem Dia
113232	Plug Valve L/O for 15/16” - 1 3/8” Stem Dia
113233	Plug Valve L/O for 1 3/4” - 2 1/8” Stem Dia
113234	Plug Valve L/O for 2 3/16” - 2 1/2” Stem Dia

Plug Valve Lockout

## Butterfly Valve / Universal Valve Lockout

- Made of industrial-grade steel and nylon
- Small UVLO: for use on handle widths up to 1” (max handle thickness of 0.6”)
- Large UVLO: for use on handle widths up to 1.6” (max handle thickness of 1.1”)

Part Number	Description
51394	Small UVLO w/ 8’ Sheathed Cable Attachment & Blocking Arm
51392	Large UVLO w/ 8’ Sheathed Cable Attachment & Blocking Arm
65402	Blocking Arm Only - Small
65403	Blocking Arm ONLY - Large
50924	UVLO Base Clamping Unit Only - Small
50899	UVLO Base Clamping Unit Only - Large

Universal Valve Lockout - lockout butterfly handles with base clamping unit.

Universal Valve Lockout - lockout valves in “on”, “off”, or “throttle position” using 2 blocking arms.

## Keying And Charting Options

### Keyed Different

- Brady padlocks come "keyed different" when purchased from stock. This means that the key for one lock should not open another. Brady padlocks use 5- or 6-pin cylinders. Moreover, both cylinders and keys are precision-machined to exacting standards. This enables us to offer a greater number of unique keys than other locks with the same number of pins, making it highly unlikely that you will ever receive a duplicate lock.
- To guarantee that each lock is different, we can chart your locks, ensuring that each Brady padlock you receive is different from the others (see below).

### Keyed Alike

- When keyed alike, all locks in a set can be opened with the same key. This option is beneficial when multiple locks are assigned to a single employee. Remember, however, that under OSHA regulations no employee should be able to open a lock applied by someone else. Therefore, keyed alike locks from the same set should never be distributed to multiple employees.

### Master Keyed

- A master key can be used to open multiple locks that are keyed differently. This allows supervisors to easily remove a lock in the event of an emergency. In order for employees to retain exclusive control, master keys should be kept in a secure location that is accessible only to management.

### Key Charting

- Brady can track or "chart" your key codes upon request in order to simplify ordering of replacement locks and to avoid duplicates when ordering additional locks.

There is no extra charge for charting. Call for details.
